## ADMINISTRATOR'S REPORT June Update 2003

### **Hawaii Health Performance Plan (H2P2)**

The H2P2 Long Term Care Chapter by the Honolulu SAC welcomed local experts to share their different perspectives at their June meeting as everyone shared their thoughts on the current state and future of long term care. The six speakers, who presented real time “in the trenches” scenarios in describing the current and future status of long term care, encouraged more discussion and collaboration as we move toward an “ideal” long term care model.

### **Subarea Health Planning Councils (SACs): H2P2 Activities**

- Hawaii**      **H2P2 Chapter on Behavioral Health:** Plans and timetables are being developed to move forward on the transportation proposal related to the initiative to improve access to behavioral health services. Key stakeholders will be involved, including the county transportation department and the mayor's office.
- Honolulu**    **H2P2 new Chapter on Long Term Care** – The Honolulu SAC is re-evaluating its role as facilitator for the development of the new long term care chapter for the H2P2 update. The recent long term care forum at their June meeting will result in discussions on possible collaboration with other long term care organizations.
- Kauai**        **H2P2 Chapter on Behavioral Health:** Substance Abuse. KSAC expects to get the information on current Drug Prevention and Treatment Resources on Kauai and will proceed to distribution island-wide. Members wished outgoing members Emmaline Ihu, David Peters, Stan Yates and SHPDA Administrator Marilyn Matsunaga a fond farewell and appreciation for work “well done!”
- Tri-Isle**      The Tri-Isle SAC received the new SHPDA Health Planning Outcomes and Data Tool workbooks. They hope to reference these documents as they proceed with their H2P2 updates.
- Windward**    **H2P2 Chapter on Diabetes and other Chronic Disabling Conditions:**

The SAC members are discussing innovative community health activities they are considering for their next project. They are inviting speakers to future meetings to learn more about community diabetes programs and diabetes care groups expanding throughout the Windward community and will assess if this is an H2P2 area in which they want to get involved.

**West Oahu** Did not meet this month.

### **Research and Statistics:**

Website update: Brand new GIS maps and area profiles on health facilities and major medical equipment are now available at:

<http://www.state.hi.us/health/shpda/shgis.htm>

Utilization Survey: Achieved a 100% response rate. Distribution of the report is almost complete.

### **Certificate of Need Applications**

- |         |   |
|---------|---|
